4:10 – 5:00 PM

Barnard Hall (EPS) 103

Research Frontiers within Physics at MSU

**Professor Amy Reines, Professor Loren Acton,
Professor Anton Vorontsov, and Professor Brian D'Urso
MSU Department of Physics**

<http://www.physics.montana.edu/people/faculty/index.html>

Abstract:

Ever wonder what is so exciting about physics research at Montana State University? Here is a chance to hear from four faculty who are leaders in their field concerning the research that is forthcoming within the department. Assistant Professor Amy Reines (astrophysics), Research Professor Loren Acton (space physics), Associate Professor Anton Vorontsov (condensed matter theory), and Assistant Professor Brian D'Urso (quantum systems) will each give a brief overview of an exciting topic (or topics) that promises to enthrall. Questions are encouraged.

Host: Yves Idzerda
