Abstract:

Come to experience a sliver of what the Physics Department has to offer. From Solar Physics and Black Hole Theory to superconductors, optics and condensed matter systems, our department does research at the cutting-edge. After a brief overview from Department Head Yves Idzerda, presentations by Professors John Neumeier, Dana Longcope, and Nico Yunes will take the audience on a whirling tour of discovery so that you can glimpse at what's hot in today's physics world.

Host: Yves Idzerda and Nico Yunes
